

**Mission:**  
To care.  
To heal.  
To educate.  
To restore  
independence.

# 39 Years of Continuing Excellence

## Adena Greenfield Medical Center Physical Rehabilitation Services

### Inpatient outcomes report 2022

The Inpatient Rehabilitation Unit at Adena Greenfield Medical Center was awarded three-year accreditation by the Commission on Accreditation of Rehabilitation Facilities (CARF) in 2020 and is recognized by CARF as a Stroke Specialty Unit for rehabilitation. AGMC is the only facility in our service area with these specialty accreditations.

The Inpatient Rehab Unit provides patients with an individualized therapy plan, six days a week. Our traditional and innovative therapy methods show our commitment to providing patients with the highest standard of care. Some of the things that set AGMC apart include the enabling garden, community re-entry, driving screening, certified hand therapist, lymphedema and a variety of other unique techniques.

### How do we compare?

Our patients leave with a greater level of function. Our Functional Independence Measure (FIM) change score was 26.0 compared to 21.2 nationally.

Our patients improve more in a shorter period of time. Our average length of stay was 10.3 days, compared to 25 days nationally. Our length of stay efficiency was 3.44 compared to 1.92 nationally.

### Our rehab team consists of:

- Patient & Family
- Medical Director
- Hospitalist & CNP
- Physical Therapy
- Occupational Therapy
- Speech Therapy
- Recreational Therapy
- Rehabilitation Nursing
- Rehab Psychology
- Social Worker/Case Manager
- Program Manager
- Admissions Coordinator

AGMC is also able to provide a less intensive level of skilled care. If a patient is not able to tolerate the higher level of therapy, they can choose to come to a skilled bed (within our hospital setting) and receive the same excellent care and services at a lower level of intensity. AGMC provides individualized care based on the patients' needs and tolerance.

Outpatient Physical, Occupational and Speech therapy are available to patients to provide a consistent continuum of care. AGMC also provides Outpatient Neuropsychology services.

More of our patients return to a community setting. 87.3% of our patients were discharged back to a community setting, compared to 80.5% nationally. 7.7% of our patients were discharged to an acute setting compared to 5.7% nationally. 4.9% were discharged to long-term facilities compared to 11.7% nationally. Zero patients expired and one patient had an interruption during their stay.

# Inpatient outcomes 2022

## Diagnostic mix

Impairment	Number of Patients	Percent of Total
Orthopedic	50	35%
Debility	44	31%
Stroke	20	14%
Brain Injury	1	1%
Cardiac	8	6%
Amputee	4	3%
Pulmonary	10	7%
Other	5	3%
TOTAL CASES	142	100%

## Top diagnoses in 2022

### Orthopedic

Impairment	Percent of Total
Knee Replacement	18%
Other Orthopedic	50%
Hip Replacement	4%
Hip Fracture	28%

### How we compare

Facility	Length of Stay	LOS Efficiency*	Return to Community
AGMC	10 days	4.12	94%
National	22 days	2.01	83%

### Stroke (CVA)

Cerebrovascular Accident (CVA)	Number of Patients	Percent of Total
Right CVA	7	38%
Left CVA	11	55%
Other CVA	2	10%

### How we compare

Facility	Length of Stay	LOS Efficiency*	Return to Community
AGMC	12 days	3.05	95%
National	61 days	1.34	71%

*\*(LOS) length of stay efficiency measures the rate of functional improvements, so a higher value is better.*

In summary, more AGMC rehab patients were discharged to their homes in a shorter length of time, with greater improvement, than the national average.

### Patient satisfaction

The 2022 IP press ganey top box ranking scores are as follows:

Nurses treat with courtesy & respect	94.6% top box
Physical therapy services	85.25% top box
Staff talked about help when you left	93.5% top box
Recommend the hospital	84.9% top box
Cleanliness of hospital environment	79.45% top box

- All of the rehab staff, nurses and doctors provided the best care I have received in any hospital I have been in. I cannot say enough kind words about them.

- Best people, the best care. I tell everyone about this place. Best one in the state.
- Greenfield Hospital is very good to go there for therapy.
- Staff is caring and considerate. I would highly recommend Greenfield Medical Center for therapy.
- All of the staff were great from the room cleaners to the Doctors. Both physical and occupational therapists were great. The social worker set up what we needed at home and was awesome.
- They all were wonderful. The therapy staff were very kind and helpful. The progress I made was due to their care. I'm very thankful I was at Greenfield Hospital Rehab.
