

## **Center for Women and Children Project**

The Center for Women and Children is a 117,000 square foot five (5) wing addition to the existing hospital featuring a steel and concrete structure on concrete foundations with stone veneer, metal panel, and cased window exterior. This project included the following: forty (40) new variable acuity patient rooms, five (5) new labor and delivery rooms, two (2) C-Section rooms, a well-baby and level two (2) nursery, twenty (20) new post-partum rooms, new lobby and support areas to accompany the new areas. Danis Building Construction Company will be the construction manager for the project.

If you would like additional information regarding the bidding process and schedule please contact Jim Albertson with Danis Building Construction Company at (614) 761-8385 or by e-mail ([jalbertson@danis.com](mailto:jalbertson@danis.com)).
