

A photograph showing a physical therapist, a man with a beard wearing a grey t-shirt, assisting a patient, a man with short dark hair wearing a light blue t-shirt. The therapist is holding an orange dumbbell and guiding the patient's arm as they perform a bicep curl. They are in a bright room with large windows in the background.

Mission:
To care.
To heal.
To educate.
To restore
independence.

42 Years of continuing excellence

Adena Greenfield Medical Center Physical Rehabilitation Services

Inpatient outcomes report 2025

The Inpatient Rehabilitation Unit at Adena Greenfield Medical Center was awarded three-year accreditation by the Commission on Accreditation of Rehabilitation Facilities (CARF) in 2023 and is recognized by CARF as a Stroke and Amputation Speciality Unit for rehabilitation. AGMC is the only facility in our service area with these specialty accreditations.

The Inpatient Rehab Unit provides patients with an individualized therapy plan, six days a week. Our traditional and innovative therapy methods show our commitment to providing patients with the highest standard of care. Some of the things that set AGMC apart include the enabling garden, community re-entry, driving screening, certified hand therapist, lymphedema and a variety of other unique techniques.

How do we compare?

Our patients leave with a greater level of function. Our patients improve more in a comparable amount of time. Our average length of stay was 13 days, compared to 12 days nationally. Our functional efficiency was 5.10 compared to 4.77 nationally.

Our rehab team consists of:

- Patient & family
- Medical director
- Hospitalist & CNP
- Physical therapy
- Occupational therapy
- Speech therapy
- Recreational therapy
- Rehabilitation nursing
- Rehab psychology
- Social worker/case manager
- Program manager
- Admissions coordinator

AGMC is also able to provide a less intensive level of skilled care. If a patient is not able to tolerate the higher level of therapy, they can choose to come to a skilled bed (within our hospital setting) and receive the same excellent care and services at a lower level of intensity. AGMC provides individualized care based on the patients' needs and tolerance.

Outpatient Physical, Occupational and Speech therapy are available to patients to provide a consistent continuum of care. AGMC also provides Outpatient Neuropsychology services.

More of our patients return to a community setting. 89% of our patients were discharged back to a community setting, compared to 85% nationally. 4.5% of our patients were discharged to an acute setting compared to 7% nationally. 5% were discharged to long-term facilities compared to 8% nationally. Zero patients expired and zero patients had an interruption during their stay.

Patient satisfaction

The following information is a summary of the outstanding patient satisfaction survey results for January through December of 2025. We are very proud of these results.

- Would you recommend Adena to your family or friends (scale of 1 to 10), avg. 10/10
- Rate how well we met your expectations throughout your stay., avg. 10/10
- Hand hygiene compliance, 99.7%

What positive experiences stood out to you about your stay?

- The therapy staff were very kind and helpful. The progress I made was due to their care.
- Staff is caring and considerate. I would highly recommend the medical center for therapy.
- All of the rehab staff, nurses, and doctors provided the best care I have received.
- People that work here are great. Get in there and roll up their sleeves. Always willing to help.
- All staff. Kitchen, nurses, aids, therapists, they cared about me as a person and worth saving.
- Everybody that I worked with in the therapy department helped boost my confidence and I haven't had that for awhile.
- All the employees. They are great. Great attitudes.

Inpatient outcomes 2025 | Diagnostic mix

Impairment	Number of Patients	Percent of Total
Orthopedic	51	38%
Debility	32	24%
Stroke	33	25%
Pain syn	2	1%
Cardiac	9	7%
Amputee	4	3%
Pulmonary	2	1%
Non traumatic spinal	1	1%
TOTAL CASES	134	100%

Top diagnoses in 2025

Orthopedic

Impairment	Percent of total
Knee replacement	24%
Other orthopedic	37%
Hip replacement	15%
Hip fracture	24%

How we compare

Facility	Length of stay	Functional efficiency*	Return to community
AGMC	11 days	5.35	92%
National	11 days	5.34	89%

Stroke (CVA)

Cerebrovascular accident (CVA)	Number of patients	Percent of total
Right CVA	17	52%
Left CVA	11	33%
Other CVA	5	15%

How we compare

Facility	Length of stay	Fuctional efficiency*	Return to community
AGMC	18.5 days	2.75	87.9%
National	14.6 days	3.88	77.6%

Amputation

Amputation	Number of patients	Percent of total
Lower extremity BKA	2	50%
Other amputation	2	50%

How we compare

Facility	Length of stay	Fuctional efficiency*	Return to community
AGMC	8.5 days	4.92	100%
National	12.6 days	3.85	77.4%

*Fuctional efficiency measures the average amount of functional improvements, so a higher value is better.

In summary, more AGMC rehab patients were discharged to their homes, with greater improvement, than the national average over all diagnosis.
